Next scheduled review	01 April 2027
Applicable law	DPDP Act, 2023 · DPDP Rules, 2025

Assessment reference: ACME-DPIA-2026-003 · Processing activity: AI customer support chatbot

1. Processing description

Acme is deploying an AI-powered customer support chatbot ("Acme Assist") on the Platform to handle tier-1 support queries. The chatbot uses large language model APIs hosted by Amazon Bedrock (Mumbai region) to generate responses based on Acme's knowledge base and the customer's account context.

2. Data categories and scale

Category	Source	Volume	Sensitivity
Customer name, email, account ID	CRM integration	~50,000 users/yr	Medium
Chat message content	User input	~200,000 sessions/yr	Medium–High
Order and billing metadata	Internal API	As needed per query	High
Conversation logs	Generated	All sessions	Medium

3. Necessity and proportionality

Tier-1 queries (password reset, invoice download, status checks) represent 62% of support volume. Automating these reduces median response time from 4 hours to 90 seconds. Alternatives considered: expanded FAQ only (insufficient for personalised queries); offshore human agents (higher cost, same data exposure). Data minimisation: chatbot receives only fields needed per query type; full PAN/card numbers never passed to the model.

4. Risk assessment

Risk	L	I	Controls	Residual
Prompt injection exposing other users' data	M	H	Tenant isolation, output filtering	L

Risk	L	I	Controls	Residual
Hallucinated incorrect billing info	M	M	Human escalation for financial queries	L
Model provider breach	L	H	Bedrock DPA, encryption, no training on Acme data	L
Excessive log retention	M	L	90-day auto-purge	L
Bias in responses to regional users	L	M	Hindi/English testing, bias audit	L
Children using business accounts	L	H	Age gate at registration	L

5. Mitigations implemented

- Privacy notice updated to disclose AI support processing
- Opt-out to human agent available in every chat session
- PII redaction layer before prompts sent to model
- SOC 2 audit of Bedrock configuration
- Quarterly review of conversation samples for quality and privacy

6. Consultation and sign-off

[x] Legal review [x] CISO review [x] Customer advisory panel (10 users) [x] Processor DPA executed

Decision: PROCEED with conditions — financial dispute queries always routed to human agent.

Approved by: Rahul Mehta, CCO — Date: 20 March 2026 — Next review: March 2027
