Appendix — Readiness scorecard

No assessment has been started, so there is no readiness score yet.

About this report

This report is a DPDP readiness and assessment output based on information, responses and evidence made available during the assessment. It is not a final legal opinion, statutory certification or guarantee of compliance. Final legal interpretation, policy approval and contractual sign-off should be reviewed by authorised legal counsel.

About the exposure figures

Exposure figures are indicative positions within statutory ceilings in the Schedule to the DPDP Act 2023, derived from your own assessment, register and remediation data under TrustStack exposure model 1.0.0. They are not a prediction of any decision of the Data Protection Board, which imposes a penalty only after an inquiry finds a breach significant and weighs the factors in section 33(2). They are not legal advice.

Statutory ceilings, not a predicted fine; penalties are per breach.

Counsel to confirm which provisions take effect on which date; until then TrustStack uses 13 May 2027 for every head.

Indicative positions use the factors in section 33(2) that TrustStack can observe. (c) Repetition — scored as 0 until breach incidents are recorded in TrustStack. (d) Whether the breach brought a gain or avoided a loss — the Board's own judgement. (f) Whether the penalty is proportionate and effective — the Board's own judgement. (g) The likely impact of the penalty on the organisation — the Board's own judgement.
